# TRADE-IN (GBP)

## Refresh with HPE & get more back

- Refresh your old compute infrastructure with HPE Gen10 Servers:
  - Easiest to manage with [HPE Infosight](#) & OneView
  - World's most [Secure Industry Standard Servers](#)
  - Industry Leading [Power & Efficiency](#)
- Get up to **\$5000** cash back for each used product
- Collected at no charge from your site
- Drive more efficient use of energy & materials. Manage your IT assets in a secure, compliant, & environmentally responsible manner. Find out more at [HPE Circular Economy](#)

Participants: End-User Customers, HPE Channel Partners

Return	New HPE Purchase	Claim Value per Node
	ProLiant DL20 Gen10	Up to £ 40
	ProLiant DL100 series Gen10	Up to £ 90
	ProLiant DL3x5 (AMD) series Gen10/Gen10+	Up to £ 300
	ProLiant DL300 series Gen10/Gen10+	Up to £ 300
Blade-, Rack- or Tower Servers of <ul style="list-style-type: none"><li>• Any brand and age</li><li>• Complete and functional</li><li>• Which had been owned by the end-customer for at least 6 months</li></ul>	ProLiant DL500 series Gen10	Up to £ 680
	ProLiant ML Series & MicroServer Gen10/Gen10+	Up to £ 260
	SY 660 Cmpt Module	Up to £ 480
	SY 480 Cmpt Module	Up to £ 340
	DX Nutanix Series Gen 10	Up to £ 510
Synergy Composer	HPE Synergy Composer 2	Up to £ 260
Enclosures or Racks	HPE Synergy Frame	Up to £ 1,260

# HPE INFRASTRUCTURE SERVICES

# CUSTOMER ASSESSMENT TOOLS

## CloudPhysics

Analyze a virtualized  
IT environment  
[Learn More](#)

OR

## Customer Asset Tool (HPE CAP)

AI Driven Discovery  
& Analytics  
[Learn More](#)

- A simple, remote, and agentless software
- Continuously monitors and analyzes a virtualized IT environment
- Today runs on **VMware** environment only

- AI Driven Discovery & Analytics Tool
- Understand the complete environment
- Results in more consultative and informative recommendations

# CLOUD PHYSICS

## Description

- Simple, remote, and agentless software continuously monitoring and analyzing IT environments, so you can help your customers upgrade, repair, and adapt their edge-to-cloud environments in the face of rapidly changing needs.
- A proven solution to help customers simulate a cloud migration, optimize workload placement, and right-size infrastructure.
- Provides sellers with insights into the customers' environment, enabling a consultative approach & delivery of tailored solutions

[Find Out more about Cloud Physics](#)

## Outcome

- Consultative & data driven sales engagement:
  - Size upgrade or replacement options.
  - Data-driven approach to onboard onto HPE GreenLake.
  - Identify areas of potential services offerings
  - Provide review of public cloud costs from major hyperscalers.
- 15 Minutes to actionable insights
- Transformed the customer purchasing experience

## Offerings

- CloudPhysics for Customers
- CloudPhysics for Partners
- Modelling for AWS & Microsoft Azure
- Analyse TCO including sustainability metrics e.g. Carbon Footprint

# CUSTOMER ASSET PROGRAM (HPE CAP)

## Description

- A remote discovery of networked devices that generates a detailed description and risk assessment of the Customer's IT environment.
- Includes details on OS and hypervisor versions, applications, disks and processors, as well as device type, age, vendor and HPE contract and warranty information
- Gain intimate knowledge of the Customer's IT by leveraging HPE CAP's deep insights and quickly create unique and Customer-centric sales and support strategies that generate account growth

## Outcome

- Consultative & data driven sales engagement:
  - Modernization, Move to Hybrid Cloud, GreenLake Transformation
  - Contract Consolidation, Support Gaps & Expiration, Post Warranty
  - Multivendor Support, Asset Disposition / Upcycling, Circular Economy
  - Mergers & Acquisitions, Security Concerns, Compliance Requirements
  - Transformed the customer purchasing experience

## Offerings

- HPE CAP with HPE Asset (remote, tool discovery)
- HPE MiniCap (remote, Customer provided list)
- Estate mapping for Datacenter planning
- Network view to enhance security

# HPE COMPUTE OPS MANAGEMENT

## HPE CoM FY23Q1 Webinar series

### What will be covered?

- Learn how HPE is helping customers become more than 4x more efficient at managing their compute real estate. Especially those difficult to maintain remote edge sites.
- Introduction to HPE's GreenLake Cloud Platform, the home of all things as-a-service.
- Invitation to download their very own 90-day free evaluation license.
- Participate in a live product demonstration conducted by one of our geo champions.

Invite your customers to attend by sending the linked email invitation to the following relevant persona's:

- IT OPS
- Systems Admins
- IT Director
- Solutions Architects

Click here to  
Sign Up now!

### Upcoming date:

- 14<sup>th</sup> December at 10:00 AM GMT

All session are approximately 60 minutes in duration.

# CUSTOMER EXPERIENCE WORKSHOPS

HPE Customer Experience days have been instrumental in both accelerating HPE opportunities and allowing customers to get comfortable and confident with all things Compute.

99% of customers that attended the events, rated them as excellent or good - with 96% stating that it increased their technical understanding of the technology.

Each **free** 7-hour workshop has the same core agenda, lasting approximately 5 hours. The remainder of the workshop will focus on one HPE ecosystem partner, so you can choose the experience most relevant to you:

- Private Cloud with VMware Cloud Foundation
- API-based Automation for DevOps
- HPE OneView and VMware Integration for HPE Rack Servers

[Sign Up Now](#)

"I invited my customer to a Customer Experience Day, and the feedback from them afterwards was excellent.

They stated that the experience greatly elevated their understanding of HPE's integration with VMware Cloud Foundation, as well as Ansible. This accelerated an opportunity we had in our funnel for HPE Synergy, and thus gained their trust as the chosen platform moving forward.

I would recommend this session for any EAM looking to gain traction within an account and build more opportunities within the account set."

- Tom Strobel, NA EAM -

# HPE'S NEWEST ADDITION: GEN 11

## Cost optimized

**1U, 1P**

HPE ProLiant DL325 Gen11  
AMD 4<sup>th</sup> Gen EPYC™ Processor

## Storage-optimized

**2U, 1P**

HPE ProLiant DL345 Gen11  
AMD 4<sup>th</sup> Gen EPYC™ Processor

## Density-optimized

**1U, 2P**

HPE ProLiant DL365 Gen11  
AMD 4<sup>th</sup> Gen EPYC™ Processor

## Accelerator-optimized

**2U, 2P**

HPE ProLiant DL385 Gen11  
AMD 4<sup>th</sup> Gen EPYC™ Processor

### Software Defined Compute

Higher performing CPUs and increased storage performance drives lower TCO for Software Defined Compute in a single socket system

### SDS and CDN

Reduced licensing costs with single socket benefiting from more performance/core and increased storage performance

### EDA and VDI

Maximum core density and high memory capacity drives density for VDI

### AI/ML, Big Data Analytics

Increased performance/core and massive parallel processing with dual socket to speed up analytics, max GPU support

## Cloud-optimized

**1U, 1P**

HPE ProLiant RL300 Gen11  
Ampere® Altra® and Ampere® Altra® Max

### Cloud-native compute

Service Providers/Digital First  
Core Count  
Scale-out
